

## Team Project 2 Contract

I hereby understand the role I am currently assigned to and is responsible to contribute the work to the group project. In the event if I cannot provide sufficient work to my group, I am liable for the impending consequences which include removal of position and removal from the group. All team members will be given one OFFICIAL WARNING at least 24 hours before being fired. An OFFICIAL WARNING will come from the course professor via email and must be requested by the team using the process outlined on the course syllabus. After this OFFICIAL WARNING has been given, a team member may be fired without any more warnings. I understand that the work I have provided during the group project prior to the firing now belongs to the group. Regular contact regarding assets, ideas, and other aspects of the development will take place in Discord. Chat logs will be used in the events to showcase any conflicts that arise.
